

California Roadster

- 13"x7" Polished Aluminum Wheels (Front)
- 14"x7" Polished Aluminum Wheels (Rear)
- P165/70R13 Radial Type Tyres (Front)
- P185/60R14 Radial Type Tyres (Rear)
- Self Adjusting Hydraulic Disks
- Self Adjusting Mechanical Drums
- Direct Drive, 48 Volts DC
- Wound Transaxle
- Electrical System 48 Volt DC
- Controller Alltrax 4844 AXE
- Programmable Charging
- On-board Delta-Q IntelliQ
- Batteries - 6 Trojan
- All Aluminum I-beam Chassis
- Fiberglass Composite Body
- Body Finish Automotive Paint
- Interior Material Marine-type
- Marine Type Synthetic Carpet
- Forward Speed 40+ KPH
- Braking Distance of 2.4 M
- Standard Seating Capacity 4
- Rear Seat Duckboard & Grip
- Optional Canopy with Hand Grips
- Optional Golf Bag Holder
- Optional CD / Radio
- Optional Carpets Mats
- Optional All-Weather Curtains
- Optional Chrome 17" Wheels
- Optional Flame Paintwork
- Optional Custom or Candy Paint

California Roadster

**Finally
a truly Custom Electric Vehicle that is reasonably priced ...**

The recognized leader in affordable Custom Electric Vehicles is pleased to introduce you to the all-new California Roadster. With a top speed of 40+ Km per hour the California Roadster is the perfect Electric Vehicle to get you where you need to be. Whether you are going to the golf course, the club house or simply out to enjoy a beautiful day, the California Roadster is your elegant choice for affordable luxury.

Unmatched Engineering....

The quality of the California Roadster beings in the engineering of the car from the ground up. The California Roadster is built using completely new parts. The frames are made from rugged and corrosion proof all aluminum I-beams. The California Roadster uses a long lasting 48-volt system to ensure maximum range using industry leading Trojan T-875 batteries managed by the computerized Alltrax, Inc. AXE4844 speed controller. The hi-output 11 peak horsepower motor is powerful enough to move you and your passengers at speeds up to 40 Km per hour and yet it is efficient enough to deliver a higher range than the industry average. The car also features an on-board 12-volt converter that gives you an in-dash power source to power your cell phone or laptop computer. For added safety, the California Roadster has been outfitted with standard automotive headlights, brake lights, turn signals, horn and is one of a few cars to feature as standard 4 wheel braking system which includes the use of front wheel hydraulic disk brakes. With all of the standard features that have been engineered into the California Roadster has reset the bar in the Custom Electric Vehicle industry to a level that has never before been seen and that other companies can only hope to come close to.

Options to Enhance your driving experience....

The California Roadster is available with a multitude of options to increase your driving comfort and pleasure. It is available as a NEV USA Certified, vehicle allowing it to be driven on city streets with a posted speed limit of 50 km or less (USA Only). It also has available leather interior upgrades, hidden Am/Fm CD players, a hard top to protect you from the sun and even full multimedia systems that include DVD players and flip-down monitors. The cars are also available with customized paint and graphics schemes to promote your company or just add that personal touch to your car.
